5 trainings sessions of 3 hours two times a week.
The dates can be found in the agenda on the website.

After the first 4 sessions, you go into your own practice and we finish this training in the 5th follow up session.

This will be training that you're ready to start "Definition of Ready"

Two different times you can choose!
The time will be from 9:00 am - 12:00 pm CET.
The time will be from 3:30 pm - 6:30 pm CET.

The maximum number of participants will be 18 in this online training and we will work active, and hands-on with Zoom, Google Jamboard, Miro and are going to use and making you familiar with others tools, too.

After this basic training you

- are able transform a subject into the eduScrum way of working and write an assignment with a clear why, and bring content into a context, where the curriculum criteria are included,
- know how to coach students and teams in their personal and team development process and guide them to be self-organizing,
- know approaches of cultivating 21st century skills of the students, especially: communication, collaboration, creativity and critical thinking,
- know how to encourage students, so they become autonomous, feel free and are happy to learn.

The eduScrum training is hands-on (no PowerPoints) such as the students eduScrum to experience too. The teachers and other participants (non-officially teachers) also experience the power of eduScrum and the iterative process.

Normally our training consists of two days, we let you experience on the first day what eduScrum is and what you can achieve. We do this by to teach the basics of one or more cases with eduScrum. We can also let you experience eduScrum by making them their own lessons or projects (with colleagues in the same section or even with colleagues with different expertise thus learn with and from each other, by looking through different glasses. We do this in consultation with the teachers and participants during the training.

The eduScrum principles, values and the whole eduScrum process we go through in the training. This has the result that the you get their hands on, the tools after the first part of the training to start. In the next session we start with sharing the teachers and participants experiences and learn from each other, what works well, not and less. We will also discuss the resistance that teachers will experience and how to deal with it. How there to they can implement eduScrum in the classrooms and to make eduScrum method sustainable for themselves and the students.

In the online environment, the basic "Definition of Ready" training takes places in 5 sessions of 3 hours.

Afterwards the teachers and participants receive a certificate "Definition of Ready – eduScrum Student".

The issues we will cover and we know our program and will be and must be agile to the wishes and expectations of the participants.

We cannot and do not work with a fixed step by step program as you know. We must be Agile to satisfy the most or all of the participants. The program is that there is no program, but in the end all issues are covered.

After and during the training you will understand what we mean with my "no program". Sounds weird maybe. We do this in all our training, because we don't know what people think and want.

After this basic training you can receive of Definition of Ready certificate, so you can start with teaching your students. After working with students, you get more experiences and build up your own portfolio about working with experiences and share your materials and you can receive a Definition of Done Teacher certificate. Next to that you can follow the eduScrum Practitioner training where you will be trained in special modules for teachers and non-officially teachers (where you exploring new fields of education and Scrum and other Agile approaches in economics and non-profit organizations. You can also become a member of our eduScrum "Agile Living Room" community where we learn and co-create together. After these stages you can be trained to become a certified and license eduScrum trainer.

Below you see a short overview about the learning paths in eduScrum. If you have any questions, feel free to ask (info@eduscrum.nl):

Wholeheartedly Welcome
to our eduScrum® Community

We don't believe in eduScrum® as a tool.
We believe in our eduScrum® students, teachers, and connectors
empowering and learning with as well as from each other.
Our eduScrum® Community is the place built and building up by this belief.

getting inspiring materials & impulse events

gaining first impressions and experiences

diving actively into the community

joining, contributing, discovering

being on the eduScrum® SHU-HA-RI – Paths

co-creating & flourishing within eduScrum®

eduScrum   inspired by learners and educators learning together
